

“Returning to Work” Perspective

As states begin to relax and lift stay-at-home orders as part of the “Opening Up America Again” federal guidelines, businesses will need well-defined and individualized plans for each location to ensure the health and safety of their employees while running effective operations. Jabian recommends considering the following three core areas:

| | PEOPLE | PLACES | PRIVACY |
|---|--|---|---|
| | <p>Who, when, and how will you bring your workforce back into the office?</p> | <p>What changes will you need to make to your business operations and locations?</p> | <p>How will you protect your employees’ data while still complying with Contact Tracing?</p> |
| <p>KEY THEMES & CONSIDERATIONS</p> | <p>Which groups/roles should come back in each wave? Do we have criteria for determining this? Have we considered our employees’:</p> <ul style="list-style-type: none"> Remote-ability and effectiveness while remote? Personal needs and considerations to include childcare, preexisting conditions, etc.? Willingness or reluctance to return to work? <p>Should some of our employees become remote permanently? Should we stagger shifts?</p> <p>Do we have a plan for cross-training to account for potential extended employee absences?</p> <p>How do we communicate these plans with our employees?</p> | <p>What do we need to put in place to make our sites ready to re-open during each phase? To ensure a safe workspace, have we considered:</p> <ul style="list-style-type: none"> CDC, OSHA, formal guidelines and requirements, such physical barriers, social distancing, and use of shared equipment? Protective equipment for employees? Protocols for cleaning, common areas, and parking? <p>How are we working with office and building managers for multi-tenant situations?</p> <p>Do we have a plan if we need to transition back to stay-at-home?</p> | <p>Are we responsible for providing and administering tests?</p> <ul style="list-style-type: none"> How will we manage employee testing? Who will administer the tests? How will results be reported? <p>Do we have policies and procedures for gathering and storing health-related data for employees’ HIPAA privacy and safety?</p> <ul style="list-style-type: none"> Who will maintain this? Who can access it? <p>Can we require quarantine or work-from-home?</p> <p>Who will manage potential and active COVID-19 cases related to workforce and sites?</p> |
